

FEMECO:

Training and Awareness Raising for Reusable Hygiene

#2 Newsletter

Transnational Partner Meeting in Kraków

On **March 14** it took place our third TPM in **Kraków**, Poland.

Partners met in this city in order to discuss and prepare the following steps regarding FEMECO Project

During the meeting, partners provided more details about the **e-learning platform** and its content, together with some advances in our social media.

WHY IS FEMECO PROJECT IMPORTANT?

"On average, a person would use around 240 disposable menstrual products per year"

"Regarding baby diapers, it is estimated that a baby spends over 2000 disposable diapers per year"

Education on hygiene products is crucial to deal with this problem: knowing how to properly recycle and the usage of reusable hygiene products can not only help the environment but also the individuals

Project partners:

EURO-MED
YOUTH
FEDERATION

What have we done?

FEMECO e-learning platform

Our e-learning platform is ready. You can access it at

<https://vle.femecoproject.com/>

and register, because soon it will host the Training module in Reusable Hygiene Products and Training module in Social and Green Entrepreneurship Manual on homemade and recyclable diapers for seniors.

Keep updated through our social media!

Soon you will be able to subscribe!
